ECE 2210  
Electrical Engineering for Nonmajors  
Fall 2008 Class Syllabus

Instructor: Arn Stolp  
Office: MEB 3256  
Phone: U of U: 581-4205  
Home: 969-5553 (Only if it’s important)  
E-mail: arnstolp@ece.utah.edu (I don’t check my e-mail very regularly, so it may be a while before I read what you send)  
Office hours: My “office hours” are the problem sessions. Otherwise it’s catch me if you can. If I’m not in my office, check the lab. To increase your chances, talk to me in class, or leave a phone message to say when you’d like to see me. I teach another class at 2:00 p.m. T & Th.

Web Site: http://www.ece.utah.edu/~ece2210/

Required books and lab supplies:  
- Practical Electronics for Inventors, by Paul Scherz  
- Lab notebook (bound or spiral)  
- Super-strip (breadboard) & Lab card to buy parts (unless you want to use my parts)

Prerequisites:  
MATH 2250 and PHYCS 2220

Introduction:  
In case you haven’t noticed, you’re surrounded by electrical and electronic devices. Electrical measurement and control is powerful and cheap, so it’s used everywhere and affects every technical career, including yours. Maybe you can find a job where other people make all the decisions concerning wiring, power distribution, electric motors, communications systems, instrumentation, and control; but do you really want that? Do you really want to be the clueless one?

This class will try to introduce you to some of the basics of electrical engineering. These may not seem important now, but I think you will find these concepts very useful in your future classes and jobs. Besides, they’ll help you pass the FE exam, and that should be of immediate concern.

I teach concepts and the use of those concepts to solve problems, not formulas and memorization. The hands-down easiest way get a good grade in this class is to learn those concepts.

This class consists of:  
Lectures: T & H 9:10 -10:05 am in WEB 2250  
Lectures set the direction and tone of the class and cover more than the written material. You will be held accountable for everything discussed in the lectures, so your attendance is important.
**Problem Sessions:** T & H 10:05 - 10:30 am in WEB 2250 (directly after class)

We cover a lot of material in this class and there is rarely enough lecture time to work examples or to answer your questions in detail. I will not cover new material in the problem session, so you can get by without staying, but I think you’ll find it worth your while.

**Textbook:**

The text contains a great deal of practical, useful information beyond the theoretical material we cover in this class. It should prove to be a good reference. Unfortunately it contains many errors. I will try to alert you to those and ask that you let me know when you find errors so that I can share those too.

**Handouts:**

There will be a lot of handouts for, homework, labs, notes, etc.. I will hand these out before class and/or place them by the doors, look for them as you enter class. I will leave any extras outside my office until they are all gone (my virtual web site). Finally, many of the handouts may be downloaded from the class web site; http://www.ece.utah.edu/~ece2210/

**Homework, homework, and more homework:** 100 pts.

I will assign many problems for you to turn in, most of which will come from hand-outs, expect homework at every lecture.

Homework will be your main study tool. As such, I’ll give you all the answers so that you can check your work immediately. In fact, you’ll have to self-correct your homework. If you can’t get the answer, check the web site for corrections, study some more, come to the problem session, ask for help, or see the posted solutions. This semester I’m going to experiment with posting some solutions before the homework is due. So, you might ask, “Why is it handed in and ‘graded’?” Well, to answer a question with a question, “Would you even do it otherwise?” The grader will simply check to see that you’ve done all the problems and that your paper shows the necessary work to get the answer. The grader may also check your work on some problems in greater detail. That means that so you will have to work neatly and clearly and show all your work. I will accept some late homework for some credit. Bring it directly to me, and don’t do it habitually.

You will probably learn more from doing the homework than any other part of this class. If you thoroughly understand the homework, you will know what the class is about, and the exams should give you no trouble.

Near the ECE office on the 3rd floor of MEB you’ll find some lockers with slots in the doors. Drop your homework in the ECE 2210 locker by 5:00 p.m. of the due date. Solutions will be posted in a glass case, also near the office. Graded homework, lab notebooks and exams will be returned to a file cabinet outside my office. Access may or may not be limited, your choice. If you want your material returned to the unlocked drawer you will have to sign and return a release form. Otherwise your material will be in the locked drawer and you will have to ask for your it and show an ID.

**Midterms:** 300 pts.

You will take three 50 minute midterms throughout the semester. They will cover
material up to the time of the test. My exams are designed to see if you learned concepts and problem solving strategies and whether you can work with them, sometimes in new and different ways. Don’t try to memorize formulas or specific problems. Exams also cover what you learn in the labs. All exams are open book, open notes.

Final: Friday, 12/19/08, 8:00 - 10:00 am
180 pts.
The final will be comprehensive with greater emphasis on the most recent material.
There will be a review the day before the exam.

Labs: MEB 2365
120 pts.
Lab will be held every week, beginning Thursday, 8/28 and including the last week of class. I will hand out lab assignments in class. Many of the subjects covered in lab aren’t covered anywhere else in class, so make sure you pay attention and read the lab handouts. You will have to keep a laboratory notebook as a requirement of the lab. Your lab TA will collect and grade these notebooks.

Two labs will be replaced by a special lecture during lab time.

Labs are not optional. For each lab that you miss or fail ( < 60% score ), your final grade will suffer a half letter drop (5% of possible points). Be sure to make-up any labs you miss or fail.

Grades:

</tbody>
</table>

If you want any deviations from the normal requirements (say credit for labs, if you’re taking the class for a second time) you will need to see me before the work would normally be due and get an agreement in writing. You’ll need to turn in your copy of the agreement with your final, so I’ll remember to grade you properly.

Americans with Disabilities Act Information:
The University of Utah seeks to provide equal access to its programs, services and activities for people with disabilities. If you will need accommodations in this class, reasonable prior notice needs to be given to the instructor and to the Center for Disability Services, 162 Olpin Union Building, 581-5020 (V/TDD) to make arrangements for accommodations. All written information in this course can be made available in alternative format with prior notification.
