## ECE 2210/00 Exam 1 given: Spring 06 <br> (The space between problems has been removed.)

To get the most possible partial credit, always show all the intermediate values that you can calculate. If further calculations depend on a value that you can't figure out, just use a letter (like $\mathrm{I}_{\mathrm{R} 1}$ ) or a guessed value and proceed.

1. (20 pts) The voltmeter, V, reads 3 V .
a) The power dissipated by $R_{3}$ is 36 mW , what is the value of $R_{3}$. Assume that the voltmeter is ideal (has $\infty$ resistance).
b) What is the value of $\mathrm{V}_{S}$ ?

c) How much power is provided by the source?
2. (21 pts) Use the method of superposition to find the current through $\mathrm{R}_{1}\left(\mathrm{I}_{\mathrm{R} 1}\right)$ voltage across $\mathrm{R}_{2}\left(\mathrm{~V}_{\mathrm{R} 2}\right)$.
Be sure to clearly show and circle your intermediate results.

Remember, you need $I_{R 1}$ and $V_{R 2}$
Be sure to clearly show and circle your intermediate results.

3. (21 pts) a) Find and draw the Thévenin equivalent of the circuit shown. The load resistor is $\mathrm{R}_{\mathrm{L}}$.
b) Find and draw the Norton equivalent of the same circuit.

c) Find the load current using your Thévenin equivalent circuit.

ECE 2210/00 Exam 1 Spring 06 p2
4. (20 pts) Use nodal analysis to find the voltage across $\mathrm{R}_{2}\left(\mathrm{~V}_{\mathrm{R} 2}\right)$.

You MUST show all the steps of nodal analysis
work to get credit, including drawing appropriate symbols and labels on the circuit shown.
b) Find the current through $\mathrm{R}_{3}\left(\mathrm{I}_{\mathrm{R} 3}\right)$.

5. (18 pts) For the waveform shown, find:
a) peak-to-peak voltage, $\mathrm{V}_{\mathrm{pp}}$
b) amplitude, A
c) period, T
d) frequency fin cycles/sec or Hz
e) frequency $\omega$ in radians/sec

f) the phase angle in degrees
$g)$ a complete expression for $v(t)$, include numbers and units

## Answers

1. a) $4 \cdot \mathrm{~K} \Omega$
b) $14.7 \cdot \mathrm{~V}$
c) $132 \cdot \mathrm{~mW}$
2. $5.5 \cdot \mathrm{~mA}$
6.5•V

a) $7 \cdot \mathrm{~V}$
b) $100 \cdot \mathrm{~mA}$

c) $20 \cdot \mathrm{~mA}$
